Pioneering Communications Transformation, Together

We do things differently so you can do things differently.

As a communications service provider, you’re heading to new territories that are brimming with opportunity. To get there, you need a partner who is familiar with the where you want to go – into a world shaped by software. VMware philosophies, expertise and technologies can help guide you on your journey, allowing you to pioneer new business models along the way.

**Multi-Cloud**
Enable service delivery from public clouds and edge to RAN and core with VMware technologies that provide carrier-grade agility.

**Customer-First**
Regain control of your network innovation to enable customer-centric operations and innovation.

**Social Responsibility**
Builds a diverse and inclusive environment that enriches lives—inspiring people to give more than they take.

**Open Ecosystems**
Simplify multi-vendor networks and gain the power of choice to achieve better innovation.

**Supportability**
Get the guidance and support you need for Day 0-1-2 operations through our worldwide team of telco network experts.

**Security**
Streamline policies through the software layer and provide more visibility and control to easily identify and remove threats.

**Sustainability**
Significantly reduce energy consumption and greenhouse gas emissions, even as 5G proliferates, using our sustainability-focused solutions.

**Leadership**
We have the cloud expertise to help shape standards, and labs initiatives to ensure future agility.

---

**Economic Benefits of the VMware Telco Cloud Automation and Horizontal Infrastructure**

- **38%** OpEx savings by removing siloed operations
